Dear Andrew,

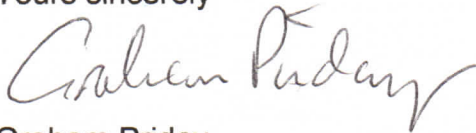

RE: MIPA PAINTS, HAVANT

I can confirm that John Priday Construction Ltd will maintain the existing and new surface water drainage to include gullies, pipework, manholes, attenuation and vehicle interceptor. We will maintain the drainage during the construction phase and hand over to MIPA Paints on completion having carried out a drainage CCTV survey to confirm the pipe condition.

We recommend that following this, a maintenance agreement is set up to maintain the drainage system post construction.

If you require further information please do not hesitate to get in touch.

Yours sincerely

Graham Priday
Director
