

NOTES

1. Dimensions are accurate at time of site observation. Do not scale from printed drawings except for planning purposes.

2. Dashed line pipe sizes (where shown) have been gauged on the ground and are not to be taken as a guide to the actual size of the pipe. They should be regarded as approximate only.

3. Although this is a digital survey the accuracy and amount of data collected is dependent on the skill of the surveyor and the quality of the equipment used. It is not a substitute for a full scale of mapping as specified. Care should be exercised when working to larger scales.

Visible features in the vicinity of the boundaries as shown above, may not represent the extent of legally conveyed ownership.

While every effort has been made to achieve accuracy on this plan, CRUCIAL dimensions, levels and level levels should be checked prior to design and construction.
