Further to our correspondence dated 17/08/2018 concerning the above planning application consultation, Southern Water has recently undertaken more detailed network modelling as part of a network growth review.

The results of this assessment, to our current Modelling procedures and criteria, indicates that the additional foul sewerage flows from the proposed development will not increase the risk of flooding in the existing public sewerage network.

Southern Water would have no objections to discharge condition 19 relating to foul drainage. Approval for the connection should be obtained under a section 106 connection application.

The Council's Building Control officers/technical staff and the Environment Agency should be consulted regarding the discharge condition 17 and 18 for surface water run off disposal.

Southern Water would have no comments to make with regards to other conditions being subject of consultation.

Yours sincerely
