

NOISE ASSESSMENT
APPLICATION BY MONOLUTION
UNITS 1-3 SOLENT BUILDING, SOUTHMOOR LANE

The agent is aware that most applications for a B2 use may require a Noise Assessment. However, in this case the application relates to the proposed use of a site within an established industrial location and proposes the use of this site by an engineering firm, that is already established in another (potentially) more sensitive location, without any history of noise complaints.

As the Company already has records of noise levels generated at its existing site, details of the machinery used and the noise levels generated have therefore been included within section 4 of the attached Planning Statement, and no further information is considered to be necessary.
