Proposed New Factory
At
Plot 2, Harts Farm Way,
Havant PO9 1FA**

For Ahmarra

11th January 2018

Ground Conditions

From preliminary site investigations the ground conditions are better than on Plot 3 where we used pile foundations to a maximum depth of 6m.

In this case, we are hopeful that standard isolated foundation bases can be used but this will be subject to a more detailed survey and if necessary pile foundations will again be used as on Plot 3.
