The following plan outlines the proposed planting scheme to be undertaken at the new development at Blendworth Crescent.

Planting specifications are detailed below.

Specification.

All beds are to be prepared to a minimum depth of 450mm, using quality, certified top soil with tree pits being prepared to a minimum of 700mm cubed. Before new topsoil is imported the compacted sub soil should be "ripped" or de-compacted, to ensure long-term drainage.

All compost, bark mulch and soil conditioner to be peat-free. A minimum of 25% of all vegetation to be planted must have been reared in peat free compost, and ideally sourced from local suppliers.

All plants will be spaced equally to create the correct coverage in the desired area. We would recommend that once planting has been completed, that a 75mm layer of bark is used to mulch ALL hedge, shrub and tree beds, increasing water retention and to naturally assist in repressing weed growth.

Planting density is based on an average 4 per square meter.

The remaining areas, not shown as hard landscaping or planting beds are to be laid to lawn; this can either be by using seed over a prepared bed or by turfing. In either case all areas are to be prepared by rotavating to aerate the soil and a final topsoil dressing, before seed and soil is applied.

All Turfing and seed areas should be prepared with a minimum bed depth of 150mm quality topsoil.

All trees to be planted with a tree stake and an expandable tie, water access to the roots will be provided by a single irrigation pipe.

Wildflower turf Bund

65sqm of Wildflower turf 'Landscape Mix' will be laid on a 500mm high bund formed from subsoil to increase biodiversity and provide a visually pleasing space for relaxation. The detailed species list is as follows:

Autumn Hawkbit (*Scorzoneroide autumnalis*)
 Bladder Campion (*Silene vulgaris*)
 Common Sorrel (*Rumex acetosa*)
 Cowslip (*Primula veris*)
 Lady's Bedstraw (*Galium verum*)
 Meadowsweet (*Filipendula ulmaria*)
 Perforate St Johns Wort (*Hypericum perforatum*)
 Ribwort Plantain (*Plantago lanceolata*)
 Tufted Vetch (*Vicia cracca*)
 Wild Red Clover (*Trifolium pratense*)
 Betony (*Stachys officinalis*)
 Cats Ear (*Hypochaeris radicata*)
 Common Vetch (*Vicia sativa ssp. segetalis*)
 Field Scabious (*Knautia arvensis*)
 Meadow Buttercup (*Ranunculus acris*)
 Musk Mallow (*Malva moschata*)
 Ragged Robin (*Lychnis flos-cuculi*)
 Salad Burnet (*Sanguisorba minor*)
 Wild Carrot (*Daucus carota*)
 White Campion (*Silene latifolia*)
 Birdsfoot Trefoil (*Lotus corniculatus*)
 Common Knapweed (*Centaurea nigra*)
 Common Toadflax (*Linaria vulgaris*)
 Greater Hawkbit (*Leontodon hispidus*)
 Meadow Cranesbill (*Geranium pratense*)
 Ox Eye Daisy (*Leucanthemum vulgare*)
 Red Campion (*Silene dioica*)
 Self-heal (*Prunella vulgaris*)
 Wild Marjoram (*Origanum vulgare*)

Yarrow (*Achillea millefolium*)

Wildflower seeding

Emorsgate EM2 General purpose meadow mixture to be sown at a rate of 4g per sqm over 200mm 'geosynthetics geoweb' at the proposed area. The species list for this mix is as follows.

Wild flowers

Achillea millefolium
Centaurea nigra
Gallium verum
Leucanthemum vulgare
Lotus corniculatus
Plantago lanceolata
Plantago media
Primula veris
Prunella vulgaris
Ranunculus acris
Rhinanthus minor
Rumex acetosa
Trifolium pratense

Grasses

Agrostis capillaris
Cynosures cristatus
Festuca rubra
Phleum bertolonii

Wildlife. Bird boxes etc.

Four 1B Schwegler Nest Boxes with a 32mm entrance hole will be erected within trees on site to attract a variety of birds.

Bat boxes

Bat boxes to be positioned on site by retained ecologist and installed as per specialist.

Work Schedule

To prevent any accidental damage, the soft landscaping and planting works should be undertaken once the main construction has been completed and the majority of the contractors have left the site. All planting, seeding or turfing comprised in the approved details of landscaping shall be carried out in the first planting and seeding seasons following the occupation of the buildings or the completion of the development, whichever is the sooner. Any trees or plants, which within a period of 5 years from the completion of the development die, are removed or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size or species, unless the Local Planning Authority gives written consent to any variation.
