Comment	Officer Comment
Concerned that another application has been submitted. The purpose of the planting was to conserve and safeguard the visual amenities and screening which is gradually being eroded.	Comments noted
As next door neighbour to this application I fully support it.	Noted

7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

- Whether the degree of pruning works requested would undermine the amenity value of these trees and whether this could also be harmful to their ongoing health and vitality.

7.2 My inspection related specifically to assessing the proposed works rather than generally inspecting the tree's health and condition in any great detail. I visually inspected the tree from ground level and the following report deals with the relevant issues that have been raised on site, in the application form and from my site observations.

7.3 This application to undertake works to trees protected by a Tree Preservation Order relates to the proposed pruning of a row of Cypress and Leylandii and the felling of one Cypress. The tree to be felled has previously been significantly reduced in height and there is now little live foliage left. Its removal is now considered necessary and appropriate. A reduction in height of the remaining trees the subject of this application is also considered appropriate and good management of the trees to prevent them dominating the applicants garden.

Whilst they form a boundary feature/screen and may have once been a row of trees, the regular topping of them has made them a hedge. The applicant is clearly trying to manage her garden and retain a screen for her and the neighbours and has already planted a number of trees, therefore a replacement planting condition is not appropriate or necessary and the work should be permitted.

8 Conclusion
