
Site Address:	101 Havant Road, Hayling Island, PO11 0LE		
Proposal:	Detached garage to rear. (Revised application).		
Application No:	APP/18/00653	Expiry Date:	21/08/2018
Applicant:	Mr Young		
Agent:		Case Officer:	Emma Chisnall
Ward:	Hayling West		

Recommendation: **GRANT PERMISSION**

1 Site Description

- 1.1 101 Havant Road is a mid-terrace two storey dwelling situated centrally within Havant Road on level land in Hayling Island. The dwellinghouse is constructed of a mixture of multibrick with concrete tiles and has a limited amenity space to the front which is surrounded by a low brick wall and is adjacent to the highway. Due to the forward position of No 101 the amenity space to the rear is substantial in size and is lawn as lawn. The curtilage boundary consists of timber fencing 1.8m high and parking is available to the site to the rear on an area of hard-surfacing which can accommodate two cars.
- 1.2 Two large scale garages are present along the rear of No 101 serving neighbouring dwellings in Havant Road.

2 Planning History

07/61583/000 - First floor rear extension. , PERM,15/10/2007
APP/17/00616 - Detached garage to rear, PERM,01/08/2017

3 Proposal

Detached garage to rear. (Revised application).

6 Community Involvement

This application was publicised in accordance with the Council's Code of Practice for Publicity of Planning Applications approved at minute 207/6/92 (as amended), as a result of which the following publicity was undertaken:

Number of neighbour notification letters sent: 3

Number of site notices: 0

Statutory advertisement: Not applicable.

Number of representations received: 0

7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

- (i) Principle of development
- (ii) Appropriateness of design and impact on the character of the area
- (iii) Effect on neighbouring properties
- (iv) Trees

(i) Principle of development

7.2 The application site is located within the defined urban area, therefore development is considered acceptable in principle subject to development management criteria.

(ii) Appropriateness of design and impact on the character of the area

7.3 This application follows a previous permission granted in August 2017 under APP/17/00616 for a detached garage to be positioned in the rear amenity space of No 101 Havant Road in Hayling Island. The proposal now wishes to alter the roof form to develop a barn hip to the east and west ends instead of a full hip in order to allow the potential future installation of PV panels to power an electric charging station. This shall increase the mass and bulk of the form but shall retain the previously approved footprint of the garage.

7.4 The area to the rear of No 101 Havant Road is currently hard-surfaced to accommodate two parking spaces and it would appear following a site visit that these rear areas along West Lane are used for the parking for the dwellinghouses along Havant Road. As such, two other large scale garages are already in position to the south of 101 and therefore the precedent has been set for this type of development and the works proposed to No 101 are considered to not look significantly out of place due to these other examples.

7.5 The proposed garage is considered to be of a good design and shall accommodate two vehicles using a mixture of materials including cement slate tiles, multistock brick, timber

doors and black painted timber cladding. The materials proposed are considered to suit the palette of the locality and the existing outbuilding in place within the rear amenity space of No 101. As such the proposed materials are considered to not result in a significant adverse amenity to the locality and can be considered acceptable.

- 7.6 Although the proposed development shall increase the mass and bulk of the roof form the visual impact caused as a result to the locality from going from a full hip to a barn hip is considered to be modest. The application site has an adequate space to accommodate the alteration without the works appearing obtrusive or cramped within the streetscene of West Lane and with the hip maintained to the north and south elevations the appearance of the garage is considered to be acceptable and appropriate to the locality and other development present. The works are therefore considered to be acceptable, meeting the requirements of Policy CS16 of the HBLP (Core strategy).

(iii) Effect on neighbouring properties

- 7.7 The proposed garage is to be positioned along the south curtilage of the site and shall be forward of both the neighbouring garages to the south as per the previously permitted development. As both these areas to the rear are currently used as parking areas by the neighbouring dwellings and not regular amenity space the development is considered to not significantly impact the outlook of these spaces. The screening between the development and neighbouring dwellings is considered to be sufficient as 1.8m timber fencing and although the mass of the roof to the east and west of the proposed garage shall be increased this is considered to be by a modest amount and a full hip shall be retained to the south which alongside the overall ridge height being reduced from the previously approved development the works, on balance, are considered to result in an acceptable and neighbourly relationship.
- 7.8 The garage although large in size shall be positioned off the shared boundary to the north by approximately 4.8m. The screening in place between the dwellinghouses is considered sufficient in the form of timber fencing approximately 1.8m with high level thick hedging and with the design proposing a hipped roof away from No 103 it is considered that the development would not result in an adverse impact from the outlook of No 103. It is noted that the proposed garage shall be alongside the private amenity space of No 103 yet due to the orientation of the works and distance between the developments it would ensure that the works do not create a significant adverse impact to light levels nor create shadowing as a result. The modest increase in the roof form is considered to not significantly un-balance this assessment and coupled with the reduced ridge height is considered to not create any significant additional harm. A doorway is proposed with two small lights along the north elevation and due to the use of the development as a garage and that it will be positioned towards the end of the amenity space the impact of this is considered to be acceptable.
- 7.9 Consequently, it is considered that the proposal is unlikely to appear overbearing or lead to overlooking and would have limited and acceptable impact on the properties immediately adjacent to the application site and the properties opposite or to the rear, meeting the requirements of Policy CS16 of the HBLP (Core Strategy). It is noted no letters of objection were received with respect to the scheme.

(iv) Trees

- 7.10 The validation of this application has highlighted that TPO trees are within the curtilage of the application site however this has been reviewed and it noted that TPO trees run along the southern boundary of No 97 and are to the front of No 107 to the north. The trees to the south are considered to be set sufficiently away from the curtilage of No 101 by approximately 30m so that impact caused to them as a result of the development would be negligible. It is also noted that the area opposite the trees is already

hard-surfaced at No 97 and No 99 and therefore coupled with the existing hard-surfacing at No 101 the impact caused is considered to be acceptable. The increased bulk in the roof shall not increase the original footprint previously assessed and therefore the current application is considered to maintain an acceptable impact to the trees onsite. The TPO tree to the north of No 101 is separated by a sufficient distance and as it is separated from No 101 by the highway and additional hard-surfacing and is therefore considered to remain unaffected by the proposed development. Therefore in conclusion the development at No 101 is considered to have an acceptable impact. It was not considered necessary to consult with the Council's Tree Officer due to the limited impact the structure would have.

8 Conclusion

- 8.1 The scale, siting and design of the proposal would have limited and acceptable impact on the neighbours and is therefore considered to be appropriate and recommended for approval.
-

9 RECOMMENDATION:

That the Head of Planning be authorised to **GRANT PERMISSION** for application APP/18/00653 subject to the following conditions:-

- 1 The development must be begun not later than three years beginning with the date of the previous permission granted under APP/17/00616 dated 1st August 2017 .

Reason: To comply with the requirements of Section 91 of the Town and Country Planning Act 1990 as amended by Section 51 of the Planning and Compulsory Purchase Act 2004.

- 2 The development hereby permitted shall be carried out in accordance with the following approved plans:

Design and Access Statement: Received 26.06.2018

Location and Existing Site Plan: Drawing No P001/0.101

Proposed Site Plan, Elevations, Floor and Section Plan: Drawing No P001/2.101

Reason: - To ensure provision of a satisfactory development.

- 3 The garage hereby permitted shall be retained and kept available for the parking of cars at all times and shall not be converted to living accommodation.

Reason: In the interests of the amenities of neighbouring properties and to ensure the retention of adequate on-site car parking in accordance with standards adopted in the Havant Borough Residential Parking and Cycle Provision SPD 2010 having due regard to policies CS16 and DM13 of the Havant Borough Local Plan (Core Strategy) 2011 and the National Planning Policy Framework 2012.
