

It is our intention (number 27) to remove our out outdoor toilet and leave remaining the adjoining wall to 25 and their storage room/outdoor toilet (which no longer functions as a toilet due to being isolated and plumbing remove).

I have agreed with number 25 that due to the roof being one roof that we shall rectify the roof, refelt and replace the guttering all at a cost to myself.

I also agreed that the builder would through our proposed build secure the existing wall and storage room/toilet wall, to our new wall through wall ties.

Also agreed that when the foundations are dug that any impact to the fence would be put right at a cost to myself. However the foundations would intact reinforce the fence post foundations.

I hope this is what you require?

Any other points please email me.

Jon
