Covering letter for my change of use of garage to a dog grooming studio.

I would like to change my garage into a dog grooming studio, I have put my times down as specified on the application form however I do not intend to work either a Monday or a Friday of each week, therefore freeing up one day of the working week. Although I have put down Saturdays I do not intend to work every Saturday. Working these times will suit me for school hours too.

There is no structural change to the garage with exception to plumbing works that is needed for the bath. I also have off road parking and I only intend to do a maximum of 2-3 dogs a day. This leaves time to clear up after each dog, so I will only have 1 customer with 1 dog on each visit.

I have spoken to all my neighbours as I am aware that dogs can make noise and they are quite supportive in my idea and have no issues with my application as I am considerate of others.

Although there is 2 entrances to the garage, customers will only use one and that is the front side hinged doors. There will be a counter top when customers first walk in so therefore dogs are safe and can not escape.

Should you require any further information, I will off course supply anything that is needed.

Kind regards
