Dear David,

Application APP/18/00845 Land at Oak Park , Leigh Road, Havant - further information for condition 8

Further to the queries raised by the Flood Water Management Team, I can confirm that the service yard area will be used for the limited temporary storage of inert building materials and temporary fencing. It may temporarily be used for the short term parking of vehicles during site survey works, however the majority of parking will be by the contractors compound, as shown on plan PL-105 on the existing area of hard standing. There will be no storage of any chemicals, diesel etc. and no washing of vehicles or use of water supply within the service the area. There will be no other activity likely to generate pollutants.

I hope this helps. Please come back if you have any further questions.

Yours sincerely

Rosie Roome MA (Hons) MA MRTPI
Senior Planner and Urban Designer
