Our Ref

PLAN-021249

Date

09/01/2018

Dear Sirs,

Proposal: Proposed partial demolition of rearward extension and carry out internal alterations, external alterations to include front & rear dormers to main roof slopes of existing building to provide 4no. number serviced apartments, and erect a proposed first / second floor side extension to provide 4no. flats. Retention of pub at ground floor.

Site: The Wellington Public House, 73 London Road, Waterlooville, PO7 7EX.
APP/17/01355

Thank you for your letter of 21/12/2017

Please find attached a plan of the Southern Water sewer records showing the approximate position of a public foul sewer within the site. The exact position of the public sewers must be determined on site by the applicant before the layout of the proposed development is finalised.

Please note:

No development or new tree planting should be located within 3 metres either side of the external edge of the public sewer and all existing infrastructure should be protected during the course of construction works.

No new soakaways should be located within 5 metres of a public sewer.

Due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction

works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.

The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk”.

Southern Water requires a formal application for a connection to the public foul and surface water sewer to be made by the applicant or developer.

We request that should this application receive planning approval, the following informative is attached to the consent:

“A formal application for connection to the public sewerage system is required in order to service this development, please contact Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk”.

It is the responsibility of the developer to make suitable provision for the disposal of surface water. Part H3 of the Building Regulations prioritises the means of surface water disposal in the order

- a Adequate soakaway or infiltration system
- b Water course
- c Where neither of the above is practicable sewer

Southern Water supports this stance and seeks through appropriate Planning Conditions to ensure that appropriate means of surface water disposal are proposed for each development. It is important that discharge to sewer occurs only where this is necessary and where adequate capacity exists to serve the development. When it is proposed to connect to a public sewer the prior approval of Southern Water is required.

The Council’s Building Control officers or technical staff should be asked to comment on the adequacy of soakaways to dispose of surface water from the proposed development.

The detailed design for the proposed basement should take into account the possibility of the surcharging of the public sewers. We request that should this application receive planning approval, the following informative is attached to the consent:

“Detailed design of the proposed drainage system should take into account the possibility of surcharging within the public sewerage system in order to protect the development from potential flooding.

Yours sincerely,

A handwritten signature in black ink, appearing to be "J. Smith".
