Dear Sir/Madam

REVISED CONDITION - CONTINUATION WITH BEACH MANAGEMENT ACTIVITIES ON THE SOUTH COAST OF HAYLING ISLAND (FERRY INN TO HAYLING ISLAND SAILING CLUB) BY RECYCLING BEACH MATERIAL TO PROTECT EASTOKE FROM FLOODING.

FORESHORE AT SOUTH HAYLING, SEA FRONT, HAYLING ISLAND

Thank you for consulting the Environment Agency on the above planning application.

Environment Agency Position

Following recent discussions with Havant Borough Council and the Eastern Solent Coastal Partnership we are now in a position to recommend revised a condition for the above proposed works.

Planning Condition(s):

Condition – Bathing Waters

In the event that works within 1km of Beachlands West, Beachlands Central and Eastoke Bathing Water Areas have to be undertaken during the Bathing Water Season (May – September):

- 1) The Construction and Environmental Management Plan (CEMP) will be updated prior to each campaign. It will identify how works will comply with the requirements of the Bathing Waters Directive to ensure that the works are acceptable and will not have an impact on the Water Framework Directive Bathing Water Protected Area. The updated CEMP will be approved by the Environment Agency and once approved the CEMP shall be adhered to at all times.**
- 2) The applicant is required to contact the Environment Agency at least one week prior to the commencement of works.**

Reason

To protect bathing water quality and bathers in accordance with the Bathing Water Directive.

Advice to Local Planning Authority (LPA) / Applicant:

The proposed works are within the EU designated bathing waters of Beachlands West, Beachlands Central and Eastoke, and the works are scheduled to take place during the bathing season which runs from May to September. Mobilised sediment may pose a risk to bathing water quality particularly if it is associated with bacteriological contamination. While we accept that the levels of suspended sediments will be relatively low as a result of the coarse materials to be used, this still represents an additional risk to bathing water quality.

Yours faithfully

Mr Jon Maskell
Planning Advisor, Environment Agency
