

Heritage Statement for 7B Beechworth Road, Havant.

The application site falls within Havant's St. Faith Conservation Area.

The application site is a semi-detached turn of the century dwelling, which forms part of a previously detached dwelling, which we understand was sub-divided, many years ago, to form two dwellings.

The dwelling is a pleasant brick faced building with box sash windows, stone lintels and some later additions.

This application proposes to remove the existing sub standard, rear, UPVC conservatory and replace it with a slightly larger single storey extension.

The proposed extension will have no visual impact on the St. Faith's Conservation Area.
