NOTES

- ALL DRAWINGS TO BE PRINTED AT 100% SCALE. DO NOT FIT TO PRINTER MARGINS WHEN PRINTING.
1. This drawing is copyright of ASC Design. Reproduction is only to take place with written authority.
 2. These plans are subject to Planning & Building Regulation Approval or any other statute in law before building work commences.
 3. Any structural work where mentioned on this drawing is subject to a structural calculation and civil engineer's calculations before building work commences.
 4. All boundaries are assumed. To be confirmed on site before building work commences.
 5. All drawings marked preliminary are not to be built or manufactured from.
 6. Only Local Authority Planning Departments may scale dimensions from the drawings.
 7. If any discrepancies are found in the drawings these are to be brought to the attention of ASC Design.

CDM REGULATIONS 2015

ASC Design Services LTD wish to point out that the CDM Regulations 2015 apply to this work and the project may require notification to the Health and Safety Executive (HSE) if the project is notifiable. The designers have attempted to eliminate hazards so far as is reasonably practicable during design and where hazards could not be avoided the designers have reduced the risks associated. The remaining hazards and foreseeable risks that could not be designed out of the project have been identified as below:

FALLS: from heights during installation of new roof elements; windows, fascias, soffits and general high level decoration - refer to the attached a method statement and risk assessment specific to the works.

HAZARDOUS MATERIALS: i.e. asbestos- to be removed as necessary by specialist. If you suspect you have located asbestos, or have been advised that asbestos is present, you should seek advice and obtain specialist advice to confirm removal requirements.

EQUIPMENT: ensure there are controls and training in place regarding the use and suitability of all equipment on site.

WORKING AT HEIGHTS: Specialist training and equipment for safe lifting and working at heights. All operatives should be trained and competent in the use of the equipment.

PROTECTION: site operatives are to be protected at all times. Refer to the attached a method statement and risk assessment specific to the works for the necessary PPE required and how to avoid potential risks.

SERVICES: buried services may exist under the floors, with their location to be confirmed prior to the commencement of works on site.

SCAFFOLDING: ASC Design Services LTD are not competent to specify scaffolding requirements for the built stages. In addition to the scaffolding requirements for the built stages, the Contractor should ensure that the scaffolding is erected and dismantled in accordance with the relevant standards. The Contractor should always check that the boards are installed, and that suitable hand rails are present. Risks from working from height should be detailed in the Contractor's method statement and risk assessment specific to the works. Prior to the commencement of work, the Contractor should ensure that all operatives have been deemed safe to work from a competent person / specialist. When working from heights the contractor and site operatives should ensure that suitable body harnesses and fall protection are used and that you are working such that if you were to fall you would be protected.

ADDITIONAL DESIGNERS NOTES: any significant or unusual risks from the proposed works should be identified by you and then advised of potential risks on site. If you find that in view that the site conditions do not reflect the above, STOP WORKING and let the appropriate persons know.

PLEASE NOTE: ASC Design Services LTD, as far as the CDM regulations 2015 are concerned, are not the Principal Designers, and that the Client is reminded to ascertain their responsibilities under the CDM regulations 2015 for the safety of the site, and to appoint the Principal Designer to the project. The Principal Designer should be appointed by the Contractor, as they are best suited to advise design considerations for safe working practices for their own staff on site.
