5. Pre-application Advice

Has assistance or prior advice been sought from the local authority about this application?

☒ Yes ☐ No

If Yes, please complete the following information about the advice you were given (this will help the authority to deal with this application more efficiently):

Officer name:

Title: First name: Surname:

Reference:

Date (DD/MM/YYYY): (Must be pre-application submission)

Details of the pre-application advice received:

main points;

1. The principle of development The site is located within the built up area of Emsworth. Within this area there is a presumption in favour of sustainable residential development subject to other development control criteria.

In terms of the acceptability of development in the garden of an existing property, referred to as 'infill development' in the Council's Supplementary Planning Document for new residential development and extensions, I refer to sections 5.25 and 5.33. These advise that the proposed development should look to the immediate site context for reference and respect the layout and character of the surrounding area.

2. The impact on the character and appearance of the area The proposed development comprises the construction of a substantial detached two storey property with a basement. Whilst it is noted that the immediate residential area comprises detached and semi-detached dwellings of mixed size and design, the development still needs to be appropriate to the extent of the plot and how it integrates with the patterns and form of development immediately surrounding the site.

It is noted that the proposed dwellinghouse shall be positioned within bungalows, chalet bungalows, two storey properties and as such there is no acknowledged street pattern in terms of design. It would also be set back from the highway and the building line of the existing property. However, I do have concerns about the scale and overall height of the proposed property and would advise consideration is given to this, previous to any application being submitted.

3. The impact on neighbours' residential amenities The scheme will need to take account of the character and nature of surrounding development and how this would relate to the proposed unit. I am of the view the new dwelling may appear overbearing and adversely affect the amenity of the occupiers of 9 Warblington Road due to the proximity to the eastern boundary.

However, the full impact on neighbours residential amenities would be assessed in detail during the consideration of any planning application.

Conclusion In conclusion you will appreciate that given the above comments I am unable to support the submission of a planning application for a dwelling based on the current scheme. I am doubtful whether the proposal could be accommodated on the site without appearing overbearing in scale. However, I am of the view the site could be considered for development albeit with a revised design to reduce the mass and height of the proposal. I am happy to look at any designs you may wish to present for further comment.
