

Dear Planning Services,

I have reviewed the application APP/17/01092 and cannot currently provide advice based on the information provided.

Please could the applicant provide answers to the following questions?

- When will the works be carried out and for how long will they last?
- How will the stakes be driven into the seabed? What machinery will be used?
- How will the mud be cleaned of the slipway and placed behind the new stakes? What machinery will be used?
- Will the footprint of the jetty including stakes remain the same size?
- Will the works be carried out from the jetty or will access to the foreshore be needed? If so, by what machinery?

Many thanks,

Chloe Smith
