On Behalf Of: Environmental Health Manager, Community Group

Comments

I have reviewed the revised plans and have not identified any material amendments which would alter the comments made previously within the Environmental Health (Jonathan Driver) consultation response to APP/17/00548 dated 14 August 2017. That response included suggested wording for appropriate planning conditions (contamination & UXO watching brief & construction risks), an informative relating to petroleum storage & dispensing, and recommendations for related conditions (drainage, wording not suggested). Dialogue would be welcomed as to the most appropriate method (in planning terms) of securing appropriate protection of the potable supply to prevent this service functioning as a vector of exposure to known residual contamination - in line with enforceable provisions attached to the outline consent to which this application is subordinate.
