

9 Wensley Gardens – Tree Statement.

Havant Borough Council have asked for a statement regarding the the trees shown on the plans for the rear extension to the above property.

The Trees to the front of the property will be unaffected by the works and as a matter of course our construction notes ask contractors to avoid the placement of materials near tree roots.

To the rear of the property there are no trees within falling distance of the proposals. The gap to the side of the house and the southern boundary is a close boarded fence to maximise the width of the plot for boat storage and garden amenity etc.

The planting shown is a mixture of existing and new shrubbery and is no closer than 6m from the house.

Below is a picture of the existing rear of the house and you can see that there are no near trees for the extension to effect.
