Prunus laurocerasus

P. laurocerasus is a vigorous, large, spreading evergreen shrub with handsome, glossy dark green leaves to 15cm in length. Small white flowers in erect racemes to 12cm in length are followed by cherry-like glossy red fruits soon turning black.

Plants

10

Ligustrum ovalifolium 'Aureum' (v)

'Aureum' is a dense, large evergreen shrub of erect habit with oval, rich yellow leaves sometimes marked green in the centre. Flowers small, dull white, in small panicles. Fruit a small glossy black berry.

Honeysuckle (*Lonicera*)

12

Lonicera (honeysuckle) are popular garden plants with highly perfumed flowers. There are climbing honeysuckles, which are wonderful draped over pergolas and supports, and evergreen shrubby types, which make good hedging plants.

Quick facts

- Common name** Honeysuckle
- Botanical name** *Lonicera*
- Group** Climbers and shrubs
- Flowering time** Climbers flower in summer; shrubs in late winter, spring or summer
- Planting time** Deciduous in winter; evergreens in spring or autumn
- Height and spread** Various
- Aspect** Full sun or partial shade
- Hardiness** Mostly fully hardy, some tender species e.g. *L. hildebrandiana*
- Difficulty** Easy
