

NOTES:

Drainage:
All drainage invert information has been obtained through visual inspection only, with no entry into manholes. Therefore the use of critical importance we suggest the services of a specialist drainage expert be used.

Trees: A report has been made to identify and detail all trees on site but where trees are of critical importance we suggest the use of a specialist such as an arborist. Tree spread and heights are indicative.

GPS: GPS levels and grid are obtained using industry standard guidelines from a specialist surveyor. Therefore all GPS detail is relative to the time and date of the survey.
