Our Ref

PLAN-020021

Date

05/10/2017

Dear Sirs,

**Proposal: Demolition of existing conservatory and erection of two storey rear extension,
Juliet balcony and roof alterations.**
Site: 30 Hollow Lane, Hayling Island, PO11 9EX.
APP/17/01012

Thank you for your letter of 19/09/2017.

Please find attached a plan of the Southern Water sewer records showing the approximate position of a public surface water sewer crossing the site. The exact position of the public sewers must be determined on site by the applicant before the layout of the proposed development is finalised.

Please note:

- No development or new tree planting should be located within 3 metres either side of the centreline of the public sewer for sewer diameter less than 450mm, and 3.5 metres for sewer diameters of 450mm to 600 mm
- No spoil, construction materials, construction plant and equipment is to be stockpiled or stored over Southern Water apparatus, including gravity sewers, rising mains and water mains. There should be a 3-metre stand-off distance maintained. All existing infrastructure should be protected during the course of construction works.
- No new soakaways should be located within 5 metres of a public sewer.

Due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the

above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.

The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".

Southern Water requires a formal application for a connection to the public foul and surface water sewer to be made by the applicant or developer.

We request that should this application receive planning approval, the following informative is attached to the consent:

"A formal application for connection to the public sewerage system is required in order to service this development, please contact Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".

It is the responsibility of the developer to make suitable provision for the disposal of surface water. Part H3 of the Building Regulations prioritises the means of surface water disposal in the order

- a Adequate soakaway or infiltration system
- b Water course
- c Where neither of the above is practicable, (surface water) sewer

Southern Water supports this stance and seeks through appropriate Planning Conditions to ensure that appropriate means of surface water disposal are proposed for each development. It is important that discharge to sewer occurs only where this is necessary and where adequate capacity exists to serve the development. When it is proposed to connect to a public sewer the prior approval of Southern Water is required.

Yours sincerely
