Dear Sir or Madam,

We have supplied you with a quote below for the works discussed.

Marshall's Savanna Traditional Drive way.

1. Remove and clear an area approx. 30 square metres to the depth of .200mm and clear from site.
2. Lay terram membrane over the area.
3. Install concrete path edgings on open edges on a concrete bed with backing.
4. Import .100mm of limestone scalps and compact with a whacker plate.
5. Lay aco rain drain channels from edging to edging on a concrete bed and connect pipe work to a void crate soak away system.
6. Infill with with .50mm of compacted 5mm grit to new levels and lay Savanna.
7. Kiln dry sand with a whacker plate for a finished product.
8. Leave site clean and tidy.
