The building is Grade II* listed and began life as a simple C17 farmhouse. It was improved in the C18 reflected in the current distinctive 'Strawberry Hill Gothic style. In 1828 the property was acquired by Sir Theophilus Lee. His cousin Arthur Wellesley was the first Duke of Wellington. Section 16 of the Planning (Listed Buildings and Conservation Areas) Act 1990 ("1990 Act") requires local planning authorities to have special regard to the desirability of preserving a listed building, its setting or any features of special architectural or historic interest when considering whether to grant listed building consent.

The approach has been well considered to minimise the impact (limiting impact on existing rafters) by using a well designed rooflight that sits flush in the roof. I am therefore satisfied that there is no loss of important historical fabric. The chosen location is well screened and is not visible from any views of the building which minimises their visual presence. I am satisfied that the work has minimal impact on the building's special architectural and historic interest, providing much needed access to the attic space.

No Conditions.

6 Community Involvement

7 Planning Considerations

7.1 Having regard to the relevant policies of the development plan it is considered that the main issues arising from this application are:

- (i) Impact upon the character and setting of the listed building
- (i) Impact upon the character and setting of the listed building

Sections 16 and 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 require Planning Authorities to have special regard to the desirability of preserving listed buildings or their setting or any features of special architectural or historic interest which they possess. The site is an important grade II* listed designated heritage asset. The approach has been well considered to minimise the impact (limiting impact on existing rafters) by using a well designed rooflight that sits flush in the roof. Given this it is considered that there is no loss of important historical fabric. The chosen location is well screened and is not visible from any views of the building which minimises their visual presence. It is therefore considered that the work would have minimal impact on the building's special architectural and historic interest, providing much needed access to the attic space. As such the proposed works are considered to conserve the character and setting of the listed building and conservation area.

8 **Conclusion**

The proposed works are considered to conserve the character and setting of the listed building and conservation area.
