

APP/16/01242 | Application for prior notification of proposed upgrade of telecommunications installation through replacement of the existing 14m high monopole with a new 15m high monopole supporting 3No. antennas, installation of 2No. additional radio equipment cabinets and development works. | Land at Sparkes Boatyard, Wittering Road, Hayling Island 16.2232

This application for a replacement telecommunication mast is not likely to result in ecological impacts. The existing facility is being replaced and the works will take place outside any nationally- or internationally-designated sites. The areas of the designated sites nearest to the proposed works area include land used as a marina and can therefore be expected to be less favourable to bird species associated with the sites. I would not therefore expect noise and visual disturbance to be a potential impact.

If you have any queries please don't hesitate to contact me.

Kind regards,

Tristan
