Subject: Re: Sand school 132 Havant Road Hayling Island APP/17/00596

Hello David

Further to the applicants agreement to an extension of time I now attach the amended drawing.

The existing sand surface is drained via a field drain into the adjacent ditch/stream and the proposed sand surface area will be porous and will similarly be drained through a field drain.

The applicant cannot be definitive on the actual hours of use but expects that this will be no more than at present. The sand surface is essential for the health of the horses and will be in use when required.

Regards Les
