Dear Daphne,

Thank you for consulting Natural England on the above application and with regard to the discharge of conditions (CEMP).

Many thanks for your email and response from Richard with regard to the sea wall.

For clarification, it would be useful if we could see a simple footprint plan of the existing wall, new wall after works, area of repair works/scaffolding and Mean High Water.

It would also be useful to know when the sea wall works are planned to be undertaken and the duration of the works.

Also, we note a barrier is proposed to restrict access/dust/run-off during the demolition and construction work. Please could this barrier be covered in tarpaulin during demolition to prevent any drift onto the designated sites when the dampening down is occurring. Further measures may be necessary in windy conditions.

Please call if you would like to discuss the above or need further information.

Kind regards
Rachel Jones
