

Havant & Waterlooville Football club storage

Planning statement to support Application reference APP/17/00483 “*Change of use of basketball court siting of storage container for storage of football club equipment*”.

Havant and Waterlooville Youth Football Club require the provision of on site storage to support the delivery of their football programmes for local young people, the storage will be used for items associated with the day to day running of the football club.

This planning statement is submitted to support the application reference APP/17/00483, in response to the invalid planning application letter.

1.

a) The access point to be utilised for the delivery and placing the container in situ will be from the vehicle access from Somborne Drive, please see included “*access.pdf*”. From here the existing perimeter path will be used to deliver the container to its siting, please see included “*access route.pdf*”. During the delivery the path will be closed to pedestrians, pedestrians will be diverted across the field.

b) The access route will allow for the delivery vehicle to approach the hard stand from the North, meaning that as there are no trees situated there access can easily be gained to the hard stand, please see included “*img_0895.jpg*”. There are trees located around the hard stand, as to protect these during the delivery phase the trees will be cordoned off to easily highlight to the trained operative during delivery.

c) The container is to be a permanent solution to storage issues that the club are currently facing. The club have liaised with officers within the estates team to formalise an agreement for use once the container is in place.

I hope this satisfies the further requirements for planning.

Matthew Tyler
Community Sport and Leisure Officer
Havant Borough Council
