

Arboricultural Statement

The proposed fence is located adjacent to an existing *Leylandii* Cyprus hedge which is in the ownership of Fair Acres. The hedge is in a poor condition with multiple specimens having died.

The fence is to be located within the boundary of The Barns and hence will be located close to the existing hedge. Therefore the fence posts will be located between the trunks to minimise any impact on the hedge. The posts holes will be 300mm in diameter and 600mm deep and backfilled with gravel and concrete.

The proposed fence posts will have a minimal impact on the existing hedge.
