Dear Daphney

Thank you for your message.

Strictly in order to carry out the improvement works necessary to raise the sea wall as required by the Environment Agency and in accordance with the planning consent and to erect temporary scaffolding associated with these works, access to the foreshore via the existing slipway is necessary. However I can confirm that the sea wall and slipway will not encroach into the designated site as a result of the proposed works.

I trust this allays the concerns of Natural England.

Please get in touch if you have any queries.

Kind regards
Richard
