

Dear Mrs Crawford,

APP/17/00775 3: Beacon Square, Emsworth: Two storey side extension to facilitate disabled access master suite

Thank you for your consultation. The site is located on the periphery of an area identified in the past as the possible location of a Saxon settlement in the Emsworth area and a number of Saxon finds have been recorded during works to the north and north west. However, the very small scale of the proposed development, combined with the fact that it is located within the footprint of the current garage and therefore will have been impacted by this modern development, means that there is little likelihood of ground works associated with construction exposing any interpretable archaeological features that would add to our understanding of Saxon Emsworth. I would therefore not wish to raise any archaeological issues in this instance, although it may be worth drawing this consultation response to the attention of the applicant with my contact details and if during the course of the works they do recognise any artefacts perhaps they would be so kind as to let me know.

I would continue to be grateful to be consulted on any future application for development in this vicinity, even if quite modest, as even a slightly larger extension to that currently proposed and located in an area previously undisturbed by modern development, might merit archaeological interest.

Yours sincerely,

Neil J. Adam BA ACIfA
Senior Archaeologist
