Our Ref

PLAN-019042

Date

26/07/2017

Dear Sirs,

Proposal: Proposed alterations to front elevation with canopy roof and rendering.
Site: 20 Keyhaven Drive, Havant PO9 4BX.
APP/17/00683

Thank you for your letter of 06/07/2017.

Please find attached a plan of the sewer records showing the approximate position of a public foul sewer within the site. The exact position of the public sewers must be determined on site by the applicant.

Please note:

1. No construction works parallel to the sewer within 500mm (in plan).
2. No new soakaways should be located within 5 metres of a public sewer.
3. All other existing infrastructure should be protected during the course of construction works.

Furthermore, due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site.

The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk.

It is the responsibility of the developer to make suitable provision for the disposal of surface water associated with the increase in impermeable surface area. Part H3 of the Building Regulations prioritises the means of surface water disposal in the order

- a Adequate soakaway or infiltration system
- b Water course
- c Where neither of the above is practicable, (surface water) sewer

Southern Water supports this stance and seeks through appropriate Planning Conditions to ensure that appropriate means of surface water disposal are proposed for each development. It is important that discharge to sewer occurs only where this is necessary and where adequate capacity exists to serve the development. When it is proposed to connect to a public sewer the prior approval of Southern Water is required.

The proposed development would lie within a Source Protection Zone as defined under the Environment Agency's Groundwater Protection Policy. The applicant is advised to consult with the Environment Agency to ensure the protection of the water supply source.

Southern Water requires a formal application for any new connection to the public foul and surface water sewer to be made by the applicant or developer.

We request that should this application receive planning approval, the following informative is attached to the consent:

"A formal application for connection to the public sewerage system is required in order to service this development, please contact Southern Water, Sparrowgrove House Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".

Yours sincerely

A handwritten signature in black ink, appearing to read "J. M. and".
