Our Ref

PLAN-015735

Date

06/10/2016

Dear Sirs,

Proposal: Single storey rear extension.

Site: 35 Bridefield Crescent, Waterlooville, PO8 8QY.

APP/16/00978

Thank you for your letter of 28/09/2016.

Please find attached a plan of the sewer records showing the approximate position of a public surface water sewers within the site.

- No works parallel to the sewer within 500mm (in plan).
- No new soakaways should be located within 5 metres of a public sewer.
- No new tree planting should be located within 3.5 and 3 metres either side of the centreline of the public surface water sewers.

Due to changes in legislation that came in to force on 1st October 2011 regarding the future ownership of sewers it is possible that a sewer now deemed to be public could be crossing the above property. Therefore, should any sewer be found during construction works, an investigation of the sewer will be required to ascertain its condition, the number of properties served, and potential means of access before any further works commence on site. The applicant is advised to discuss the matter further with Southern Water, Sparrowgrove House, Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk.

Southern Water requires a formal application for any new connection to the public foul and surface water sewer to be made by the applicant or developer.

We request that should this application receive planning approval, the following informative is attached to the consent:

"A formal application for connection to the public sewerage system is required in order to service this development. Please contact Southern Water, Sparrowgrove House, Sparrowgrove, Otterbourne, Hampshire SO21 2SW (Tel: 0330 303 0119) or www.southernwater.co.uk".

It is the responsibility of the developer to make suitable provision for the disposal of surface water. Part H3 of the Building Regulations prioritises the means of surface water disposal in the order

- a Adequate soakaway or infiltration system
- b Water course
- c Where neither of the above is practicable sewer

Southern Water supports this stance and seeks through appropriate Planning Conditions to ensure that appropriate means of surface water disposal are proposed for each development.

The proposed development would lie within a Source Protection Zone as defined under the Environment Agency's Groundwater Protection Policy. Southern Water will rely on your consultations with the Environment Agency to ensure the protection of the water supply source.

Yours sincerely
