Dear Mrs. Wooden,

43 GREYWELL ROAD, HAVANT, PO9 5AH

Thank you for your letter of the 13th September 2017 and the opportunity to comment upon the application. Having considered the application I have the following comments to make with reference to crime prevention.

As this application is for the replacement of an existing Automatic Teller Machine (ATM), my comments relate to the security of the ATM and those replenishing the ATM.

To provide for the security of the ATM itself I recommend:

1. The ATM should be secured to the floor slab using a recognised fixing system, as outlined within the ATM Security Working Group Best Practice Guidance, there is no information relating to this in the documentation provided
2. The installation of a monitored alarm system with appropriate sensors to detect early signs of an attack to premises and to the ATM

From the plans supplied it appears that replenishment will take place from within the shop. To provide for the safety of those replenishing the ATM and those within the shop should it be open when replenishment occurs, I recommend:

1. The replenishment procedures outlined with the ATM Security Working Group Best Practice Guidance are followed.
2. The installation of CCTV cameras to provide images of the rear of the ATM.
3. The installation of a monitored alarm with a panic button for use by those replenishing the ATM
