Details of the pre-application advice received:

Dear Ms Grant

Site Location: 7 James Road, Havant, PO9 3EL

Re: Proposed new dwelling.

I am writing to you further to your enquiry received on the 19 January 2015 regarding the above address.

The main issues in relation to a proposal of this nature are considered to be:

1. The principle of residential development
2. The impact on the character and appearance of the area
3. The suitability of the proposed development in terms of residential amenity
4. Garden provision
5. Highway requirements
6. Community Infrastructure Levy requirements

The principle of residential development

The application site is located within the settlement area of Havant where the principle of development is acceptable provided the development is in accordance with the Development Plan and all other material planning considerations.

Whilst private garden areas are not included within the definition of previously developed land, the position of the site within the settlement area is a material consideration.

The National Planning Policy Framework (NPPF) establishes a presumption in favour of sustainable development however this should not be to the detriment of the local area.

Paragraph 6 makes it clear that regard must be had to the document as a whole in determining what the Government's view of sustainable development means in practice. It promotes the effective use of land through the re-use of previously developed land. With paragraph 49 stating that "housing applications should be considered in the context of the presumption in favour of sustainable development."

However, paragraph 56 makes it abundantly clear that "Good design is a key aspect of sustainable development, is indivisible from good planning, and should contribute positively to making places better for people." Paragraph 58, bullet 4 seeks to ensure that development responds to local character, with bullet 6 requiring good architecture. Paragraph 59 seeks to ensure the sustainable construction of the dwellings, whilst paragraphs 60 and 61 seek to ensure the development is designed well accounting for local context.

Policy CS16 of the Havant Borough Core Strategy Local Development Framework 2011 seeks to reflect the requirements of the NPPF at a local level. It too encourages the principle of development within the settlement area, provided that any new development pays proper regard to the character and appearance of the area, design and neighbour amenity.

The impact on the character and appearance of the area

James Road is residential in nature comprising largely of similar style and design two storey dwellings. It is noted that the proposal would seek to replicate the built form both in terms of scale and design. It is considered that this approach is acceptable in this instance.

It is noted that there is an access road to the south of the site leading to a private parking area. At the moment the access road is open by the fact that there is no immediate development either side of it. The proposal would alter this characteristic.

It is important that open spaces are retained where appropriate to prevent the enclosing of the streetscene. However, in this instance because there is additional space on the other side of the access road I do not see this as a reason to object in this case.

I am concerned that the front garden would be given over to hardstanding and that the parking layout shown at the front would not meet the minimum size requirements for a parking space (2.4m by 4.8m), however it would appear with slight modification this issue could be overcome. You would however need to show refuse storage for the new and retained dwelling.

Overall the simple form and design is reflective of the immediate area and the general layout in keeping also. As such I do not believe that the proposed development would materially harm the general character and appearance of the area and would largely comply with the objectives and requirements of the NPPF, 2012 and policy CS16 of the Havant Borough Core Strategy Local Development Framework 2011.

The suitability of the proposed dwelling in terms of residential amenity

Having regard to the positioning of the dwelling and the separation distances between neighbours I am of the view that the development would not result in unacceptable harm to neighbour amenity.

Garden Provision

The garden space shown would meet with the Council's minimum size requirements and would provide sufficient passive recreational space for a one bedroom dwelling.

It is also accepted that suitable garden space is retained for the existing two bedroom dwelling.

Highway requirements

The proposal shows one space per dwelling. Normally a two bedroom dwelling would require on-site parking provision for two spaces, however it is noted that there is no on-site provision shown at present. Therefore in this instance one space per dwelling is considered to be acceptable.

I would highlight however that the rear parking space would be from the private access road. Therefore any formal planning submission would need to suitably show that this could be achieved and that there would be a right to access this parking space from this road.

Subject to car and cycle parking for the proposed development being provided in accordance with the Council's Residential Parking and Cycle Provision Supplement 2015.

6. Pre-application Advice

Has assistance or prior advice been sought from the local authority about this application?

☒ Yes ☐ No

If Yes, please complete the following information about the advice you were given (this will help the authority to deal with this application more efficiently):

Officer name:

Title: First name: Surname:

Reference:

Date (DD/MM/YYYY): (Must be pre-application submission)

Conclusion:

In conclusion, the proposed development is considered to be acceptable in principle, subject to an amended parking layout to the front and confirmation that on-site parking can be provided to the rear.

I trust this information is of assistance.

Please note that the above comments are the opinion of an individual Planning Officer and are in no way binding upon the Council when determining an application for planning permission and nor will they prejudice the outcome of any application submitted.

This advice also only relates to planning matters, and does not relate to any other application that may be required under the Building Regulations or under any other Act, Regulation, Byelaw or Order where the Council's approval may be needed. For further guidance as to the need for consent under the Building Regulations please phone 023 9244 6571.

Yours sincerely
