

Opaque glass panels
with wind gaps

View from No. 24

Glass privacy screens

Rear Elevation 1:50

Eight opaque glass panels in total to be fitted, four either side of the decking. Six panels will be 1.7 m high from finished deck, the last two panels nearest the reserve will start at 1.7 m, but will have a curve down to soften the overall appearance. The panels will be 10mm toughened glass, with spacing for air flow.
