Dear Rachael,

Thank you very much for consulting Natural England on the CEMP for the above planning application.

It is noted that a barrier is proposed to restrict access/dust/run-off during the demolition and construction work to the protected sites, except during the sea wall works. We would advise that this barrier is covered in tarpaulin during the demolition and construction work to prevent any drift onto the designated sites when the dampening down is occurring.

There is a typo error in Section 3 of the CEMP (Monitoring, compliance, reporting). The permissible noise levels during the over-wintering period should not exceed 69dbA rather than 96dbA.

Provided these amendments are included, we have no further comments on the CEMP and are happy for this condition to be discharged.

Please let me know if you need any further information.

Kind regards
Rachel

Natural England is accredited to the Cabinet Office Customer Services Excellence Standard.

Natural England offers two chargeable services – The Discretionary Advice Service (DAS) provides pre-application, pre-determination and post-consent advice on proposals to

developers and consultants as well as pre-licensing species advice and pre-assent and consent advice. The Pre-submission Screening Service ([PSS](#)) provides advice for protected species mitigation licence applications.

These services help applicants take appropriate account of environmental considerations at an early stage of project development, reduce uncertainty, reduce the risk of delay and added cost at a later stage, whilst securing good results for the natural environment.
