Dear Michael

Re: Land at Havant Road, Warblington- Noise Impact Assessment

Further to your recent correspondence and to respond specifically to the technical queries made by Mr Mark Moss, Environmental Health Officer at Havant Borough Council.

In his memo dated 30 August 2016 (in which he commented on an earlier noise impact assessment) Mr Moss stated the following:

Furthermore the following query with regard to the Noise Impact assessment, needs to be addressed, with additional conditions being imposed if necessary:

Has the potential for a distinctive tonal noise from traffic on the A27, especially during wet weather, been taken into consideration; and in the same vein will the double glazed window profiles being recommended, suffice if it is an issue?

I can confirm that the noise impact assessment for the scheme (final report Reference R3173-3 Rev 2) has been carried out in accordance with national planning guidelines and is compliant with all relevant standards and guidance. In particular the scheme has been engineered to ensure that noise levels internally within the proposed new dwellings will comply with the requirements of British Standard 8233:2014.

I trust you will find the above to your satisfaction but should you have any queries please do not hesitate to contact me.

Yours sincerely,
For 24 Acoustics Ltd
