Addendum 2 to Appendix 2 Planning Permission B2 (Local)
Item 23. Noise Impact Assessment

I have been having talks with a Noise Assessment Consultant. He has furnished me with the thought that the major concern with excess noise is the effect it would have on local housing and offices. There isn't any local housing at all and the nearest offices are over 100m away, so I think that those facts would nullify the concerns.

Nearly all our tools are hand tools and machinery wise we have 4 in no. car lifts and 1 in no. Hydrovane compressor which is practically silent.

We have in place on the vehicle entrance/exit heavy duty plastic door curtains which contains the noise within the units.

We haven't had any noise complaints at all in the 4 years we have been on the site.

I am very loathed to spend the amount of money involved as I am positive they would come to the same conclusion.

I would welcome a site visit so that you or your representative could witness the noise levels for yourselves.

Most of the noise would come from the mechanics snoring at break times!!

If I can be of any further assistance please do not hesitate to contact me.
