

Revised planning application for 25 Bound Lane Boundary Fence

As 1.8m high panels are considered likely to be too high, I have accepted advice to submit a revised application removing the top third of every panel, leaving the panels only 1.2 m high. As the panels are already in place I have marked these photographs with a dark line where the new top of the panels will be. The panels will also be reversed, showing the smooth side to the street, giving a general continuity of appearance down the street, where a large number of the fences are the same style and material, and in many cases significantly higher than 1.5m.

(1) Drive entrance and first 2 panels

(2) Centre panels of fence

(3) 25 Bound Lane last 2 panels of new fence, driveway to no. 27
