Havant

Hampshire,

Re: Your Ref: APP/17/00614

I thought I would Comment on this application, I wonder as to why under the DDD, DEAD DECEASED & DYING rule the council decided to put an application into its-self to remove this tree when it could have just removed it, without the additional and expence of administration, advertising, clerical, and for the two members of staff it took to place the A4 notice on the lamp Colum and not forgetting the Norse staff and the damage to the environment.

Why is this dangerous DDD tree left overhanging our garden for such a long time and the two rotted limbs on tree 12 also why is the Ash tree No: 18 continuously being re tied up with rope this tree was topped over 14 years ago and consistently moves do we have to wait for another council owned tree like No:18 that fell over crashing into Mr. S Taylor house at 24.

Other Councils have the policy if its dead deceased or dangerous they remove it regardless of what the neighbours say and replace it with a new sapling.
