- Electricity Cable
- Earth Rod
- Telecom/CATV Cable
- Traffic Control
- Gas Pipe
- Water Pipe
- Surface Water Sewer
- Drainage Channel
- Rain Water Downpipe — RWP
- Foul Water Sewer
- Soil Vent Pipe — SVP
- Empty Duct
- Service Tunnel
- Unkown Utility
- Unable To Trace Further — UTTF

Notes:

Utilities depicted hereon have been detected using the latest non-invasive technologies the performance of which can be adversely affected by factors outside of our control such as weather and ground conditions. Whilst Safe Digging Ltd make every effort to detect all utilities it cannot guarantee 100% detection.

Depths indicated are given to the approximate centre of the utility, therefore strike depth could be less depending on the diameter.

Utilities may continue outside the extents of the survey area. Any paint marks outside of this area are for investigative purposes and may not represent the full extent of the sub-surface utilities.

Either semi-permanent, biodegradable or chalk colour coded markings will be used, depending on customer specification, to mark the positions of the utilities during the survey. The lifespan of the markings is dependant on the type of marking used and external factors such as weather and traffic. This drawing should be used as sole reference for the utilities survey.

IRRESPECTIVE OF THE INFORMATION PROVIDED ON THIS UTILITY SURVEY AND OTHER PLANS, ANY GROUNDWORKS SHOULD BE UNDERTAKEN WITH CAUTION AND IN ACCORDANCE WITH HSE GUIDELINES: HSG 47 - AVOIDING DANGER FROM UNDERGROUND SERVICES.

Safe digging
