

Your ref – APP/17/00621 Repair and renew existing sea defences and slipway. Seafield House,
Woodgaston Lane, Hayling Island, PO11 0RL
Our ref – 221390

Dear David,

Thank you very much for consulting Natural England on the above application.

The proposed works are located within the Chichester and Langstone Harbours SPA, Ramsar Site and the Solent Maritime SAC. These nature conservation sites are also designated at a national level as the Chichester Harbour SSSI.

The proposed slipway and sea wall will be replaced on a like-for-like basis except for a 25cm increase in the height of the sleeper wall. The works will be undertaken outside of the bird overwintering period (October to March) and we would advise that this is a condition of any planning approval.

Natural England also advises that all contractors are made aware of the adjacent designated sites and associated legal obligations. In addition, all materials, equipment and machinery should be stored in a compound within the curtilage of the property, away from the designated sites.

Provided the works are carried out in strict accordance with the details of the submitted planning application, and in accordance with the above, Natural England has no objection to the proposed works.

Should the proposal change, please consult us again.

Please let me know if you need any further information.

Kind regards
Rachel Jones

Natural England is accredited to the Cabinet Office Customer Services Excellence Standard.

Natural England offers two chargeable services – The Discretionary Advice Service ([DAS](#)) provides pre-application, pre-determination and post-consent advice on proposals to developers and consultants as well as pre-licensing species advice and pre-assent and consent advice. The Pre-submission Screening Service ([PSS](#)) provides advice for protected species mitigation licence applications.

These services help applicants take appropriate account of environmental considerations at an early stage of project development, reduce uncertainty, reduce the risk of delay and added cost at a later stage, whilst securing good results for the natural environment.
