First Floor Plan

Second Floor Plan

Roof Plan

Diagram illustrating the chimney placement and roof pitch for a three-story house. The house is shown in cross-section, with the chimney located on the right side. The roof pitch is indicated as 10:12. The chimney is labeled "Chimney adopted with 10:12 pitch". The height of the unit between the proposed foundation and existing grade is marked. The diagram also shows the "Proposed ground" line and the "Floor elevation" line. The chimney is shown in two positions: one as a "Chimney removed" and another as a "Chimney added for exterior wall". The "Whitlock addition" is also indicated.

This architectural drawing shows a side elevation of a proposed detached garage. The structure features a gabled roof with a chimney on the right side, labeled "Chimney retained for extract vents". A dormer window with a semi-circular top is positioned on the right slope of the roof. The main wall has a rectangular window with horizontal slats. The roof is indicated as being "Made of raft between proposed extensions and existing gable". The drawing includes a vertical line on the left labeled "Proposed Extension" and a horizontal line at the bottom labeled "Proposed ground".

Sections 1:100 @ A1

Any discrepancies shall be reported to the contractor immediately.

Do not score from these drawings except for planning purposes.

Use figured dimensions only.

Where applicable this drawing is to be read in conjunction with other consultants' drawings.

All drawings to be read in conjunction with specifications and detailing structural engineer and mechanical and electrical drawings / specification
