RE: New application at Ranelagh Road, Havant

Works Undertaken to Date

The site known as land south of Ranelagh Road, Havant, PO9 1NR, was granted planning permission in 2013 (planning reference number OAPP/12/00772) for the erection of up to 79 new dwellings. This application was supported by the following ecological information provided by Hampshire Ecological Services Ltd:

- Ecological Assessment Report (April, 2012)
- Reptile Survey & Mitigation Strategy Report (July, 2015)
- Method Statement to Accompany natural England EPS Licence Application in Respect of Bats (June 2012)
- In addition to these documents after planning permission was granted, Ecosupport carried out updating bat surveys in support of the EPS licence (issued during Autumn 2014) as well as the translocation of the Slow Worm population (*Ranelagh Road Havant Reptile Capture*, Ecosupport 2014) to the agreed Meyrick Road receptor site.

Requirement For Additional Information

With site clearance works completed and much of the site already built it is considered that no further work is required in support of the new application. The addition of new units will remain within the existing red line boundary of the site and no additional works that may impact upon habitats of any ecological significance are expected.

Kind regards

Adam Jessop BSc (Hons) MSc
