

Hello Simon

Following the our visit I make the following comments:

- The proposed new route for the access road appears to be acceptable, although I feel that the use of a geo-cell construction is not the best option for the section that runs through the woodland along the 4x4 track. However I understand that this construction method has been specified by Hampshire Rights of Way and as such I assume is their adoptable model. Hence I raise no objection.
- The proposed tree protective fencing appears on plan to be adequate, however I would request that after the site has been set out and fencing/ground protection installed that a pre commencement meeting is arranged with the site manager and the arb consultant. This must be undertaken once a site manager has been appointed.

Please can you email a copy of the AMS and TPP for my records.

Thanks

J
