Dear Mr Butcher

STORAGE CONTAINERS – LAND ADJOINING CROFT LANE, HAYLING ISLAND

I write further to our discussion of 4 April 2001.

My enquiry followed representations that two storage containers recently placed on the land was detrimental to the amenity of the area. You explained that these are for storage of equipment in connection with the stables on site and are intended as a permanent feature.

The Principal Planning Officer for the area has considered the circumstances and is of the opinion that the containers are development requiring planning permission. You are invited to make a planning application and forms are enclosed for your convenience. However, before completion you are advised to contact Mr Ayling on extension 547 for his advice as to the most appropriate site for the containers. I should point out that whilst an application is invited, I am unable to forecast the outcome.

Yours sincerely

R P Parsons
