

36 Queens Road Arboricultural Statement

36 Queens Road has two trees that are protected by TPO number 1184- a *Quercus robur* (Oak- T1) and a *Fagus sylvatica* (Beech- T2).

They are located in the northwest of the site, as indicated on the below site plan:

Below is an aerial shot showing the canopy of the trees:

The proposal is for three elements, which will be addressed in turn in relation to their impact on the TPO trees.

1. Entrance porch and roof canopy

There is an existing front porch, which will be rebuilt off of the existing dwarf wall, so no digging is required. The new piers for the canopy will be hand dug. The porch is 29m away from the nearest TPO tree. It will not have any effect on the TPO trees.

2. Side porch and glazed canopy

There is an existing side porch and concrete slab. The new side porch will be built off of the existing dwarf walls and the canopy posts bolted to the concrete slab, so no digging is required. It is 21m away from the nearest TPO tree. This will not have any effect on the TPO trees.

3. Swimming Pool glazed canopy

There is an existing concrete base and balcony for the outside of the swimming pool. The glazed canopy will be bolted to the concrete base. It is 7m from the nearest TPO tree. It will not have any effect on the TPO trees.

In conclusion, the proposals will not have any effect on the roots or the canopies of the TPO trees.
