2 Timberlane, Purbrook, Waterloooville, Hampshire, PO7 5PH.

DESIGN & ACCESS STATEMENT

General Description and Usage

The proposal is to remove part of the existing dwelling; an old lean-to style conservatory of glass and brick construction and replace it with an extension that is very in keeping with the style and character of the property.

In addition, the proposal also intends to revert the front of the house to nearer it's original design by replacing the sliding patio doors with windows.

Front of 2 Timberlane

Design

The extension and improvements in general have a number of facets:

- In keeping with both the location and the existing house whilst also being subservient to the existing property.
- The scale of the extension is within the overall proportions of the existing house and utilises only a small portion of the large garden and plot the house is situated on.
- Replaces an element of the property that is structurally sound but is thermally inefficient.

Materials

All materials will match existing, in particular brickwork, roof tiles, windows and doors.

Windows and rear French doors will be doubled glazed replacement with UPVC frames and low energy glass to match existing.

All materials and the method of construction will meet the current Building Regulation requirements.

Floor Levels

The ground floor level will not change and will continue into the extension. As shown by the Floor & Site Levels drawing (drawing reference CHER 04).

Site Levels

As shown by the Floor & Site Levels drawing (drawing reference CHER 04).

Parking and Occupancy

Occupancy is not being increased and the house benefits from a very long driveway that can more than accommodate the required parking spaces; therefore no parking issues exist.

Landscaping

There will be no significant landscaping other than some very minor alterations to the rear garden.

Boundaries

No change to any boundaries.

Access

There are no accessibility issues as access for pedestrians, vehicles or emergency services will not be restricted what-so-ever.

Summary

As shown by the sympathetic design the extension will fit nicely into the locality without any detrimental impact on neighbouring properties or the current house. The extension would not overshadow either neighbouring property, the visual mass is in keeping with existing properties in the area and there is no loss of privacy to neighbours on either side.
