

Mr C Piper – 11 Gorseway, St Helens Road, Hayling

Monterey Pine (beside access drive)

Viewed from the west side the white lines indicate where the dead top will be pruned down to and then the north side of the crown overhang of the boundary line and road will be prune back by 1.5m to 2m to leave a tighter and more balanced upswept form to the crown.

- 8 FEB 2016

RECEIVED

Viewed from the east side the white lines indicate the points at which the dead top will be reduced down to and then the lowest branches over the road and drive will be removed to provide a ground clearance of around 2m – finally the long low laterals to the south side will be shortened back by 1.5m to 2m overall to leave a tighter and more balanced upswept form to the crown.

N.B. Every effort is to be made to make all final cuts adjacent to living growth points so that no stubs devoid of foliage are left.
